Ray Renteria

Systems Administration — Automation, Identity & Security

Phoenix, AZ (Remote) · ray@scriptsquid.dev · 951-432-9776 · linkedin.com/in/r-renteria · scriptsquid.dev · github.com/xScriptSquid

Summary

Systems administrator with 6 years in IT owning endpoint, identity, and SaaS systems across 26 remote-first locations (~825 endpoints). I automate operational work with PowerShell and Python, build internal tooling against Microsoft Graph and vendor APIs, and run day-to-day security operations: Sophos alert response, phishing triage and awareness training, MFA and Conditional Access, and incident investigation. 7,100+ escalations resolved; $800K+ in vendor savings.

Technical skills

- **Automation & Scripting:** PowerShell, Python, Microsoft Graph, REST API integration (LightSpeedVT, Sophos Central), Playwright, Azure Functions, AI-assisted development (Cursor)
- **Identity & SaaS:** Microsoft 365 & Entra ID (MFA, Conditional Access, enterprise apps & app registrations), Exchange Online, Google Workspace, Jamf Pro, role-based access control
- **Security:** Incident investigation & reporting, Sophos endpoint & email security, phishing triage & awareness training, least-privilege design, wireless/WPA auditing, audit readiness
- **Infrastructure:** Ubiquiti UniFi (multi-site), Windows & macOS administration, GoTo Resolve, FortiClient VPN, virtualization

Experience

The Motorcycle Company · Remote · 2020 – Present

IT Project Coordinator (Systems Administration & Security) · 2021 – Present

Systems administration & security, 2023 – present

- Own endpoint, identity and SaaS systems across 26 sites (about 825 endpoints); senior escalation point with **7,100+ Tier 2/3 tickets** resolved and SOPs authored for consistency and audit readiness.
- Built a **multi-platform new-hire provisioning tool** (Python, REST APIs, Playwright) that turned a manual multi-system checklist into one action, automating the joiner/leaver user lifecycle, with offboarding by deactivation to close access gaps.
- Automated M365 group and distribution-list membership with **Microsoft Graph and Exchange Online PowerShell** in a least-privilege Azure Function, run from an internal **IT operations dashboard** (React/TypeScript, Firebase) I built.
- Run **daily security operations**: Sophos alert response (device isolation, cleanup), phishing triage, email quarantine and filtering, and MFA and Conditional Access enforcement.

- Investigate security incidents end to end, report findings to management, and deliver phishing awareness training to staff.
- Right-sized Microsoft 365 licensing with Entra usage data, correcting 93 over-assigned licenses for **$8,800/year** in projected savings.
- Manage Jamf Pro (iPadOS and macOS), FortiClient VPN access for 50–60 users, and the Ubiquiti UniFi network and cameras across all locations.

Infrastructure projects, 2021 – 2023

- Ran infrastructure projects across 26 locations: acquisition technology takeovers, hardware refreshes, CAT6 runs, network upgrades and camera installs.
- Set per-site budgets ($20K–$50K) and managed timelines with 2–3 contractors per location, vendors, Finance and dealership management.
- Led vendor analysis that produced **$809,684 in annualized cost savings**.

Help Desk · 2020 – 2021

Certifications & training

- Google IT Support Professional Certificate — Coursera, Oct 2023
- Google Foundations of Cybersecurity — Coursera, Aug 2023
- Google AI Fundamentals and AI for Brainstorming and Planning — Coursera, 2026
- Microsoft SC-300: Identity and Access Administrator Associate — in progress, target Q1 2027
- TryHackMe (top 7%): Cyber Security 101, completing Dec 2026; SOC Level 1 next
- Building **sophos-endpoint-health-report**, a read-only Sophos Central audit CLI in Python; writeups at scriptsquid.dev
