Ray Renteria

Senior Systems Administrator — Automation, Identity & Security

Phoenix, AZ (Remote) · ray@scriptsquid.dev · 951-432-9776
linkedin.com/in/r-renteria · scriptsquid.dev · github.com/xScriptSquid

SUMMARY

Senior Systems Administrator with 5+ years owning endpoint, identity, and SaaS systems across 26 remote-first locations (~825 endpoints). I automate operational work with PowerShell and Python, build internal tooling against Microsoft Graph and vendor APIs, and increasingly focus on the security side: incident investigation, least-privilege access design, and wireless auditing. Resolved 7,100+ Tier 2/3 escalations and drove $800K+ in annualized vendor savings.

TECHNICAL SKILLS

Automation & Scripting: PowerShell, Python, Microsoft Graph, REST API integration, Playwright, Azure Functions

Identity & SaaS: Microsoft 365 & Entra ID, Exchange, Google Workspace, Jamf Pro, role-based access control

Security: Incident investigation & reporting, endpoint & email security (Sophos), wireless/WPA auditing, least-privilege design, audit readiness

Infrastructure: Ubiquiti UniFi (multi-site), Windows & macOS administration, GoTo Resolve, VPN/firewall access, virtualization

EXPERIENCE

Senior Systems Administrator

2023 – Present

The Motorcycle Company · Remote

- Own endpoint, identity, and SaaS systems across all 26 sites (~825 endpoints), covering secure access, device compliance, and IT operations.
- Built a **multi-platform new-hire provisioning tool** (Python, REST APIs, Playwright) that cut account setup from a manual multi-system checklist to a single action, with offboarding by deactivation to close access gaps.
- Automated M365 group and distribution-list membership by role and location using **Microsoft Graph and Exchange Online PowerShell**, deployed as an Azure Function scoped to least privilege.
- Right-sized Microsoft 365 licensing against measured Entra usage data, correcting ~93 over-assigned licenses and cutting recurring cost.
- Built an internal **IT operations dashboard** (React/TypeScript, Firebase) that centralizes provisioning and people-management behind reviewed, auditable actions.
- Investigate security risks and incidents end to end and report findings, actions, and tooling to management.
- Administer Ubiquiti UniFi network and physical security (switches, APs, cameras); standardized site connectivity across all locations.
- Serve as senior escalation point, resolving **7,100+ Tier 2/3 tickets**; authored SOPs that improved consistency and audit readiness.

IT Project Coordinator

2021 – 2023

The Motorcycle Company · Remote

- Ran 1–3 infrastructure projects per site across 26 locations: store technology takeovers for acquisitions, mass hardware refreshes, CAT6 runs, network upgrades, and camera installs.
- Set per-site budgets ($20K–$50K), managed timelines, and oversaw 2–3 contractors per location alongside vendors, Finance, and dealership management.
- Led vendor analysis that produced **$809,684 in annualized cost savings**.
- Created standardized rollout processes and checklists that kept installs on schedule and reduced delays.

CURRENTLY

Building offensive and defensive security skills through TryHackMe (SOC Level 1, Jr Penetration Tester). Personal lab and writeups at scriptsquid.dev.
